PRODUCT BULLETIN # 232

Date: 2/1/07
Subject: Chicago Faucets - New Bubblers
To: All Commercial Customers
From: Patrick Tanzillo, Product Manager, Commercial Products

Effective February 5, 2007 Chicago Faucets is proud to introduce our new Bubblers. The Bubblers have been re-designed, with added durability, safety and ADA compliance in mind. These new products are a perfect complement for school projects in your area.

Common Features

- Cast Brass Valve Body with Integral Flange
- Vandal Resistant Anti-rotational Pins
- Vandal Resistant Recessed Volume Control Adjustment
- .7 GPM Stedi-flo Inlet Adapter
- Chrome Plate Finish
- CSA Approved
- NSF61 Compliant
- ADA Compliant

Model Specific Features

- New replaceable anti-microbial flexible heads inhibit the spread of germs and protect against injury by flexing on impact
- All brass heads for areas of high vandalism
- 665 Push button handles with MVP™ cartridges for proven reliability
- Klo-Self cartridge with lever handles for hands on operation

New Models Numbers

Model Number	Description	List Price

Warranty

Chicago Faucets' Bubblers are warranted to be free from defects in material and workmanship for a period of five (5) years from the date of purchase when properly installed and serviced. The Bubblers have a lifetime warranty on the brass body and a one (1) year warranty on the chrome plate.

Promotional / Sales Support Information

- Brochures were mailed at the beginning of January 2007
- The website will be updated with photos, product descriptions and drawings by February 2, 2007

New Design Temporary Modification

Due to component availability issues, the redesigned Bubblers will utilize the nozzle from the previous Bubblers for the first few months of sales. Functionally, these two nozzles achieve the same performance. Please note that our current literature reflects the soon to be introduced lower profile nozzle.

Old Design Availability

The old design-styled Bubblers will continue to be available until August 1, 2007. However, the 748-665PSHCP will change model numbers to 748-665TBCP. The reason for this is to differentiate from the new 748-665CP model for incoming orders. Any post launch orders for the 748-665PSHCP will be converted to the redesigned 748-665CP model.
