The 640 Series

Wall Mount Faucets with Integral Stops

A reliable, convenient solution for
food service applications.

640 Series

Introducing a wall-mounted kitchen sink faucet with hot and cold water supply stops built into the faucet body. The new 640 Series is intended for use in the same applications as our popular 540 Series of 8" wall-mount kitchen faucets. These new faucets offer easy serviceability of cartridges with the integration of accessible stop assemblies.

- **Integrated supply stops** – body contains supply stops before the cartridge so there's no need to turn off main water to fitting for point of use service
- **Standard tools** – stops close and open with standard flat-head screwdriver for fast service
- **Hassle-free installation** – 7/8" radius adjustable inlet arms offer a wide range of mounting centers – from 6-1/4" to 9-3/4"
- **Interchangeability** – modular body accepts a wide range of Chicago Faucets components
