

EFS Hand Wash System

The EFS Hand Wash System

Every year, according to the Centers for Disease Control, nearly 725,000 people acquire infections while in hospitals in the United States. Hand hygiene is one of the most important ways to prevent these infections. Working with Ecolab, Chicago Faucets has developed the EFS – an automated touch-free system that delivers water and soap in a consistent, pre-defined sequence.

Model EFS-112/EFS-122

An automated system designed to improve hand-washing compliance and help reduce hospital acquired infections.

The EFS delivers a repeatable, consistent hand-washing procedure that supports efforts for improved hand hygiene in hospitals and other healthcare environments. The simple 3-step process, including a timed soap-scrubbing period, supports the CDC hand-washing recommendations to help reduce hospital acquired infections.

Lighted icons on the spout guide users through the sequence:

An easy, safe, and efficient solution for healthcare applications.

Easy to Identify

The unique look of the EFS makes hand washing systems easy to identify for healthcare personnel. The EFS includes a small placard to be placed near the system that provides simple instructions and acts as a second visual cue for staff and visitors.

Hands-Free Operation

The touch-free operation of the EFS eliminates the need to touch handles or soap dispenser surfaces. Eliminating surface contact will further support efforts to reduce the spread of harmful bacteria throughout the facility.

Water-Saving Design

By providing the right amount and completely stopping water flow during the timed scrub period, the EFS can dramatically reduce water consumption.

Easy to Service

The EFS features low-soap and low-battery indicators to provide advance warning for service. Both soap and batteries are easily accessed in the adjacent dispenser assembly.

A Choice of Configurations

The EFS is available in deck and wall mount models for installation on single hole, 4" centers, and 8" centers. The system comes complete with faucet, dispenser assembly, soap, and batteries.

EFS-110/EFS-120

EFS-111/EFS-121

EFS-113/EFS-123

Model	Description
EFS-110	4" Wall Mount with 1.5 GPM Aerator
EFS-111	Single Hole Deck Mount with 1.5 GPM Aerator
EFS-112	4" Deck Mount with 1.5 GPM Aerator
EFS-113	8" Deck Mount with 1.5 GPM Aerator
EFS-120	4" Wall Mount with 1.0 GPM Laminar
EFS-121	Single Hole Deck Mount with 1.0 GPM Laminar
EFS-122	4" Deck Mount with 1.0 GPM Laminar
EFS-123	8" Deck Mount with 1.0 GPM Laminar

We are a member of the U.S. Green Building Council and support the Leadership in Energy and Environmental Design (LEED) Green Building Rating System™, to measure the efficiency and sustainability of buildings in the U.S. and Canada. If you are trying to achieve LEED Certification for your building, our low-flow outlets, metering cartridges, and sensor-operated faucets can contribute points in these areas: Water Efficiency Credit 2: Innovative Wastewater Technologies and Water Efficiency Credit 3: Water Use Reduction

a Geberit company

We are proud to be a partner with WaterSense®, sponsored by the EPA and designed to protect the future of our nation's water supply by promoting efficiency and enhancing the market for water efficient products, programs, and practices.

We are a charter sponsor of the Alliance for Water Efficiency, a non-profit organization that is dedicated to the efficient and sustainable use of water. It brings together a diverse range of stakeholders to advocate water efficiency and conservation.

Chicago Faucets, a member of the Geberit Group, is the leading brand of commercial faucets and fittings in the United States, offering a complete range of products for schools, laboratories, hospitals, office buildings, food service, airports, and sports facilities. Whatever your requirements may be, Chicago Faucets offers standard and made-to-order products that are designed to meet any commercial application.
