

Experience Uncompromising Power

The Chicago Faucets Long Term Power System (LTPS) is designed for efficiency and long life. A high efficiency, lithium ion power cell with the largest capacity in the industry is combined with smart technology that limits self discharge. This means that LTPS will power your faucet under normal operating parameters for years and years.

*based on potential usage scenarios, individual usage may vary

Maintenance Free

No replacement batteries; saves time + money

Over 15 years of life in most applications

Based on up to 500 uses per day

Universal Solution

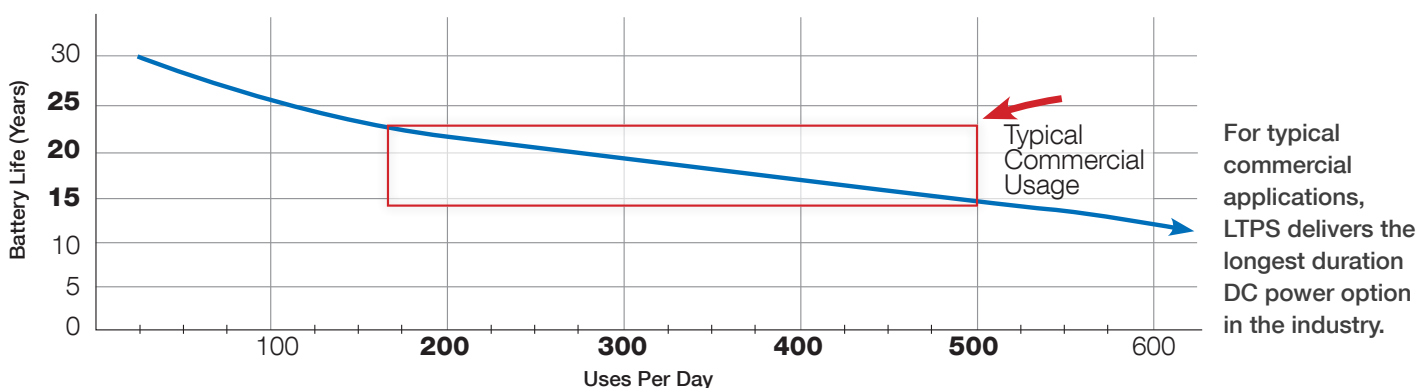

Optimized for use with HyTronic, E-Tronic, and EQ

Code Compliance

New choice for battery-backup requirements

Our Competitive Advantage

As a leader in hands-free faucets, Chicago Faucets brings you the best technology possible. No other DC power system lasts as long as LTPS in medium to high usage applications: 10 to 15 years at 200 to 600 uses per day.

For typical commercial applications, LTPS delivers the longest duration DC power option in the industry.

EQ Series

LTPS is integrated into the control box.

HyTronic®/E-Tronic® 40

LTPS is easily mounted under counter.

LTPS End-of-Life Directives (Recycling): LTPS contains materials that are required to be recycled by specialized companies. Please ensure you dispose of your LTPS according to local regulations. Follow applicable laws and regulations for transport, shipping, and disposal of batteries. For details on recycling lithium-based batteries, and to find a recycling facility near you, please contact a government recycling agency, your waste-disposal service, or visit reputable on-line recycling sources such as www.call2recycle.org.
