Alpina™ Series
works. beautifully.
Timeless, elegant design

Our new touchless faucets complement practically any restroom design with a slim, elegant profile and all functioning parts housed neatly below deck in the control box. The outlet is positioned higher than typical restroom faucets, giving the user more space for hand washing, while the touchless design improves hygiene.

- **Attractive design:** The two spout options feature a slim, timeless, and elegant form.
- **Rapid maintenance:** An innovative below-deck control box is easy to service and maintain.
- **Cost-effective operation:** Chicago Faucets durability and reliable electronics result in long-term, economical operation.

Control box

With just four main components, the control box delivers an easy-to-install, easy-to-service solution.

- Electronics are protected below deck and easily connected to the power supply.
- Available for AC or DC power. The battery can be replaced in seconds.
- Available with or without mixer for added flexibility.
- Easy-to-access stop valves are also contained within the control box.
